

Match the definition with the vocabulary word. Put your answers in the magic squares below. When your answers are correct, all columns and rows will add to the same number.

- A. Web page defacement      D. Star bus network      G. Fast Ethernet  
B. Unshielded Twisted Pair      E. Top-level domain      H. Virus  
C. Topology      F. 10BaseT      I. Hypertext

1. the cheapest cable in use today; made of one or more pairs of copper wires without any shielding.
2. another name for 100BaseT Ethernet.
3. an older Ethernet architecture, still common in small businesses and home networks.
4. links on a Web site that let you jump between pages.
5. the suffix in a domain name that indicates the type of server holding a Web site, such as .com or .edu.
6. illegally accessing a Web site and changing the appearance.
7. the most common network structure; each computer connects to a central point on the network.
8. the structure, or how the network is laid out. This is usually dependent on the network architecture.
9. a small program that copies itself and interrupts the computer or the network.

A=	B=	C=
D=	E=	F=
